OUR PHILOSOPHY

We'll help you set the tone your brand needs to re-tell its story visually. With all the options we can provide, your display will only be limited by your imagination.

We believe that storytelling is truth-telling. We'll provide you with a space that is as honest as your brand. The configuration and materials available will also enable you to display your merchandise in a way that is fully customisable to your changing needs.

A store is a story of things, components that make up the whole of a narrative. With SOKO District, your merchandise can speak for itself. No visual noise. Nothing lost in translation.

OUR PLANET

We are 100% South African-owned, and we keep our carefully selected materials local as far as possible. Sustainable sourcing and recyclability also play pivotal roles in our processes – from our exclusive and patented mechanisms to our electronic and lighting systems.

Technology is a vehicle for improving the quality and sustainability of the community we live in. Our drive towards innovation – the continual hunt for solutions towards improvement – puts us in a unique position to supply you with the best and latest technologies. Zero harm. Ecologically sound.

OUR SYSTEM

Components at any height

Our components are held in place by technical clamps, therefore there are no predefined positions. For example, components can be tailored to any width or height by simply adding as many components as needed.

Navigate different heights

Our leg fittings can be adjusted in height independently, allowing you to craft your store with ease, even confronted with tricky or uneven surfaces.

Rotate to any angle

Add a new bay at any angle – simply pivot around a shared leg or join them together to continue in the same direction.

YOUR STYLE

Our collection stands out for its unmistakable style, the balance between shapes and our unique match of materials and exclusive finishes will set your brand apart.

Solid wood and steel are the main material focus of the SOKO District collection, both with interchangeable finishes.

CONNECT

Our components and parts effortlessly integrate with our utility trees. From our power module desk units, you can connect to the utility tree via cables. On the tree, you can customise the position of the architectural lighting, engage through audio, or simply connect one of your products or your/our point-of-sale device.

Tree 1
